Notes:

^a Studies necessary for application review or studies required pursuant to application approval must be paid for by the applicant and those costs are not included in the filing fees shown above. For multiple activities in the same application, the largest of the fees apply.

^b Larger fee required for applications that must be approved by the FERC.

^c Fee for the first 12-month extension. Applicants can request a second and final extension, but must pay a second application filing fee and security deposit, and forfeit the original security deposit.

Applicability

These fees and deposits apply as noted to all allowable, non-exempted lake use requests on the following reservoirs managed by Duke Energy:

Bear Creek Lake	Lake Glenville	Lake Robinson	Ninety-Nine Islands Lake
Belews Lake	Lake Hickory	Lake Tillery	Rocky Creek Lake
Blewett Falls Lake	Lake James	Lake Wateree	Wolf Creek Lake
Cedar Cliff Lake	Lake Jocassee	Lake Wylie	
Cedar Creek Lake	Lake Keowee	Lookout Shoals Lake	
Fishing Creek Lake	Lake Norman	Mountain Island Lake	
Great Falls Lake	Lake Rhodhiss	Nantahala Lake	

Habitat Enhancement Fee

For requests on Catawba-Wateree and Keowee-Toxaway reservoirs, a separate Habitat Enhancement Program (HEP) fee may also be required. See the website ([Catawba-Wateree HEP](#); [Keowee-Toxaway HEP](#)) or contact Lake Services for additional information.

Refunds

- Application filing fees will only be refunded if the applicant withdraws the application prior to its approval by Lake Services or if the application is denied by Lake Services.
- Security deposits will be refunded provided no violations of the Shoreline Management Guidelines occur.

Enforcement Fee Schedule

- **Refusal to remove an unapproved, dilapidated, or unsafe structure:** In the event an adjoining property owner refuses to remove unapproved, dilapidated or unsafe structures, Duke Energy may remove it. Additional consequences may include loss of consideration for lake use permitting activities until the cost of removal, which includes all removal costs including Duke Energy or contractor expenses, landfill fees, and a set management fee of \$1,000, is paid.
- **Unauthorized structure built within the Project Boundaries:** After-the-fact applications may be accepted if the unauthorized structure conforms to specific requirements. The fee will be twice the current permit fee to cover additional processing costs. Non-complying structures will be subject to modification or removal and restoration of disturbed areas at the owner's expense.

Revisions

- Duke Energy may revise this fee schedule without notice.
