

Our light poles. Your attachments. A perfect fit.

Duke Energy is proud to be your trusted provider for outdoor lighting solutions. We continually look for new ways to expand and improve our platform so that our customers can enhance the service they provide. We are pleased to offer you a solution to meet your roadway and area lighting needs: light pole attachments.

Duke Energy is offering the opportunity to attach small equipment to our light poles, including cameras, Wi-Fi antennas, repeaters and more, all for a convenient monthly fee.

USE OUR SOLUTION TO GAIN A STRATEGIC ADVANTAGE

- Duke Energy will provide installation guidance and the power source to your attachment(s).
- The equipment space will be provided to help protect equipment.
- The application, review and approval process is easy.

HOW TO GET STARTED

- Contact us at OLRequests@duke-energy.com to initiate a discussion with a member of our Attachments Team.
- If you are interested in moving forward with an attachment project, you will submit an application per location (device specifications, attachment method, electrical load, weight, etc.).
- Attachment customers will receive a \$700 invoice for the initial location and a \$150 invoice for each subsequent location if submitted within the same week. Please submit payment to Duke Energy's Attachments Team for review and a Duke Energy Project Manager will be assigned to your account.

Your Project Manager will:

- Create a work order and coordinate the power source installation for your attachment(s).
- Duke Energy will install the attachment.
- Duke Energy will inspect the installation once the attachment(s) have been installed.
- The monthly attachment fee of \$10 or \$25 will be billed separately. The energy used and applicable tariff charges for non-metered accounts will be billed to the customer's monthly Duke Energy electric bill.

Please contact the Duke Energy Attachments Team at OLRequests@duke-energy.com with any questions.
