

Equal Payment Plan

Stop the billing roller coaster.

PREDICTABLE MONTHLY PAYMENTS MAKE BUDGETING EASIER.

Level your bill year-round and know what to expect with Equal Payment Plan. Fluctuations in weather conditions can cause natural gas use — along with natural gas bills — to increase as we try to keep our homes more comfortable.

How your monthly payment is determined.

Your EPP amount is based on factors such as past usage, past and expected weather, and anticipated cost of natural gas.

A midyear review will check that your EPP payments are in line with your actual usage. If not, we'll adjust to help avoid a large year-end settle-up.

At the end of 12 months, we'll balance what you've paid with your actual usage and issue a credit or invoice for the difference.
